

# BINARY TREE®

Powering Enterprise Transformations®

Power365® enables you to completely unify and move users, content, workloads, directories, and domains between enterprise environments without disrupting the business.

## POWER365®

# The Enterprise Office 365 Transformation Platform

Power365® is the most comprehensive enterprise solution built to help organizations merge, consolidate or divest their Microsoft Office 365 and Active Directory identities, data and security. Power365® enables you to analyze, integrate, move, and manage your cloud, hybrid, and on-premises infrastructure, identities and workloads.

Power365® is a 100% SaaS-based platform built on Microsoft Azure. The platform provides administrators with a single-pane-of-glass to integrate directories, setup email coexistence, share domains across tenants, and migrate the identities, mail, archives, files, folders, and devices of their users, as well as numerous shared resources, like Microsoft Teams and SharePoint.

### Domains

Integrate and migrate domains between Office 365 tenants

- Email domain sharing
- Email domain moves without downtime

### Directories

Integrate and migrate Active Directory, Azure AD, and Hybrid AD

- Establish a Unified Global Address List – plus sync attributes and passwords
- Synchronize Azure AD, Active Directory, or hybrid AD environments
- Migrate Active Directory, Azure AD, and hybrid AD environments

### Workloads

Integrate and migrate content between Office 365 tenants

- Unified free/busy calendar lookups
- Migrate email and public folders between tenants and from on-premises Exchange
- Migrate Microsoft Teams, Unified Groups, OneDrive, SharePoint, and OneNote between tenants
