

BINARY TREE®

Powering Enterprise Transformations®

Power365®
Integration Pro
delivers email
address rewrite
services,
coexistence and
migration for full
tenant
transformation.

POWER365® INTEGRATION PRO

Combine Day One Collaboration with a Unified Brand

Power365® Integration Pro delivers an automated email address rewrite service for a zero-touch, day-one collaboration experience without downtime. Ensure a unified brand identity through common email domains—on both inbound and outbound email—from different Office 365 tenants. Power365 Integration Pro can maintain existing email addresses throughout a migration or can even enable mailboxes to send as a new email domain before migration begins. You also get all features of Power365® Integration, for productive and efficient business from day one, including, unified address lists, and global access to calendar availability – in addition to Power365 Mail and Public Folder Migration for a complete migration solution.

Migrate

Move between
Office 365 tenants

- High-velocity, unlimited and uncapped migration of mail and archives between tenants or from on-premises or hosted environments

- Migrate Groups, Teams and Public Folders

- Optionally migrate OneDrive, SharePoint, and OneNote

Integrate

Synchronization
and coexistence

- Unified GAL across business units or organizations

- Access to calendars and free/busy lookup for transparency and ease of scheduling

- Synchronization between source and target mailboxes

Transform

Email address
rewrite solutions

- Share email domain names between tenants, from day one, on inbound and outbound mail

- Select your preferred domain for sending and receiving – or even choose a new domain

- Move domain name to a new tenant without downtime
